Operations & Examination Management Portal

Role-wise Functional Specification

Accounts / Finance

Version 1.1 | Updated requirements: Auditor Mock Status and Internal Project Notifications | 17 September 2026

1. Role Purpose

Controls commercial review, agreements, invoice verification, payments and financial closure.

2. Menu Headers

1. Home / Finance Dashboard
2. Commercial Review Queue
3. Cost Sheet & Versions
4. Quotation Review
5. MoU & Undertakings
6. Invoice Management
7. Payment Processing
8. Outstanding & Overdue
9. Project/Centre Finance MIS
10. Finance Audit History

3. Dashboard Visibility

Menu / Dashboard item	Visible data and action queue
Home / Finance Dashboard	Finance-only activity, approved value, due/paid/outstanding
Commercial Review Queue	Quotation review backlog
Cost Sheet & Versions	Cost-sheet versions and approvals
Quotation Review	Rates, tax, terms and decision
MoU & Undertakings	Agreement verification and expiry
Invoice Management	Invoices, mismatch and approval
Payment Processing	Payments and reconciliation
Outstanding & Overdue	Outstanding and overdue values
Project/Centre Finance MIS	Financial reports
Finance Audit History	Commercial/payment history

4. Responsibilities and Functioning

• Review quotations and approve/reject commercial terms within authority.

• Manage versioned cost-sheet changes, MoU, undertaking, invoice matching and payments.

• Provide financial closure confirmation.

• Accounts / Finance is excluded from internal project-management change push notifications, including project, audit, mock, readiness and operational status updates.

5. Role-wise Functional Flows

Flow 1

Quotation → Operations review → Finance review → clarification/revision or approval → agreement verification → commercial clearance.

Flow 2

Invoice → upload/matching → approve/rework/reject → payment → reconciliation → financial closure.

Flow 3

Finance may receive only finance-workflow notifications applicable to commercial, agreement, invoice or payment actions; it does not receive internal project-management change notifications.

6. Internal Notification Scope

• Internal notification recipients are restricted to Admin / Super Admin, Project Manager, Auditor / IT and Operations Executive, filtered further by project and assigned scope.

• Accounts / Finance and Centre User must not receive these internal project-management change notifications. They receive only workflow-specific notifications explicitly relevant to their own finance, agreement, invoice, consent, document or centre action.

• When a relevant project team member creates, edits, submits, approves, rejects, sends for rework, locks, unlocks, changes status, changes an owner/due date, records a critical finding, or updates mock/readiness/exam status, the system must create an internal push notification.

• The notification must include Project ID/name, module, record reference, change/action type, actor, timestamp, priority, short summary and deep link to the permitted record.

• Recipients must be derived from the project team assignment and relevant workflow ownership; users outside the project scope must not be notified.

• Critical/High items (booking conflict, eligibility restriction, audit failure, duplicate MAC, failed mock, readiness blocker, locked-allocation change, critical incident) notify immediately; normal changes follow configured real-time push rules.

• Every notification must be logged with trigger, recipients, delivery status, read status and record link. Duplicate notifications should be consolidated where the same action affects the same user.

7. Common Access and Control Rules

• Role access is limited to assigned client, project and centre scope.

• No critical record is silently deleted or overwritten; versions, cancellations, replacements, rework, approvals and changes are retained.

• Mandatory eligibility, document, audit, capacity, consent and approval gates must pass before the configured next stage.

• Rework/rejection decisions require reason, owner, due date and traceable history.

• Dashboard links open only the data and fields permitted to that role.

8. Development Acceptance Criteria

• Role-specific menus and dashboard widgets are permission-based.

• Mock Status Update is available to Auditor/IT only for assigned project-centre scope, with mandatory remarks where configured.

• Every approved internal change event creates a scoped internal notification and immutable notification-audit record.

• Accounts/Finance and Centre User are excluded from internal project-management notifications by role rule.

• Deep links, record visibility, notification read status and escalation must respect RBAC and project scope.
